

6.0 Conclusion — Looking Ahead

- **Networks will be the Core for Future World of Computers and Communications**
 - content of global knowledge/information/services
 - information processing/transmission/switching
 - convergence of computers and communications
 - ubiquitous computing : at any time, from anywhere
 - huge volume of information disseminated across the globe
 - user/network interaction/interface
 - multi-media information
- **Globalized, Personalized, Ubiquitous, Intelligent, Multi-media, Broadband**
 - networking, digital transmission, multi-media signal processing
