

Linear Function in Coordinate System

Hung-yi Lee

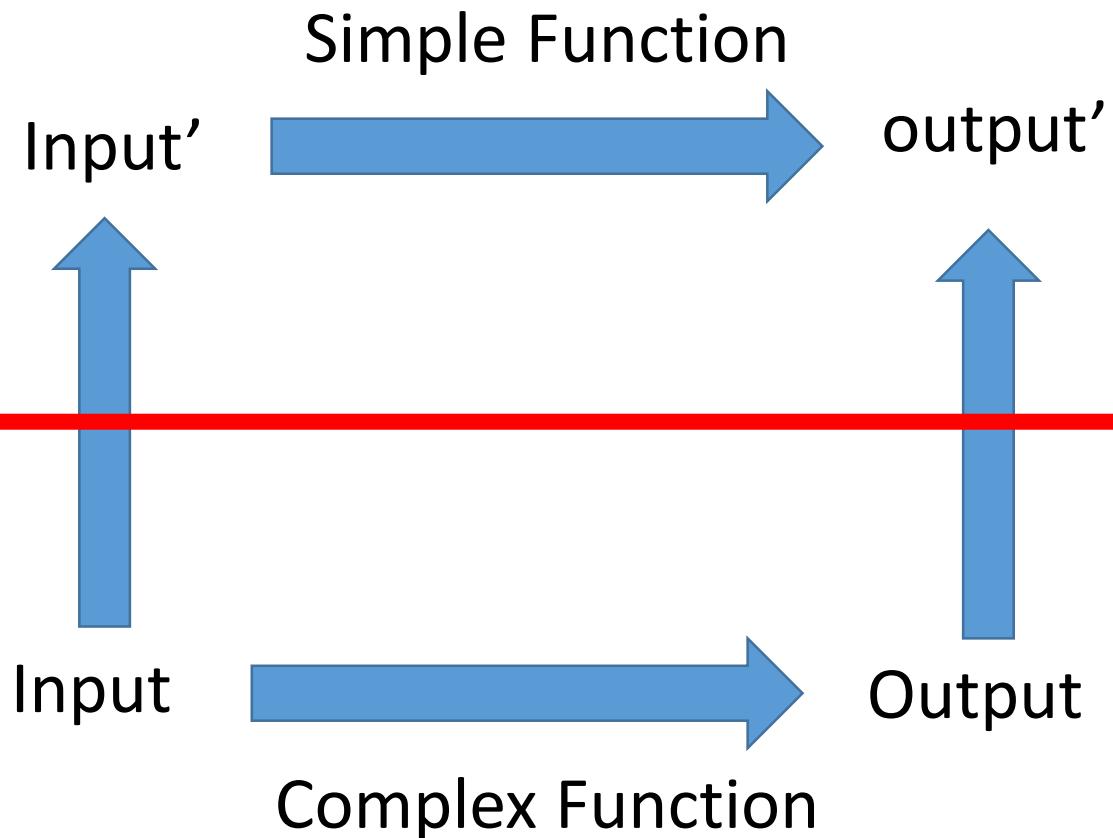

Outline

- Describing a function in a coordinate system
 - A complex function in one coordinate system can be simple in other systems.
- Reference: Textbook Chapter 4.5

Basic Idea

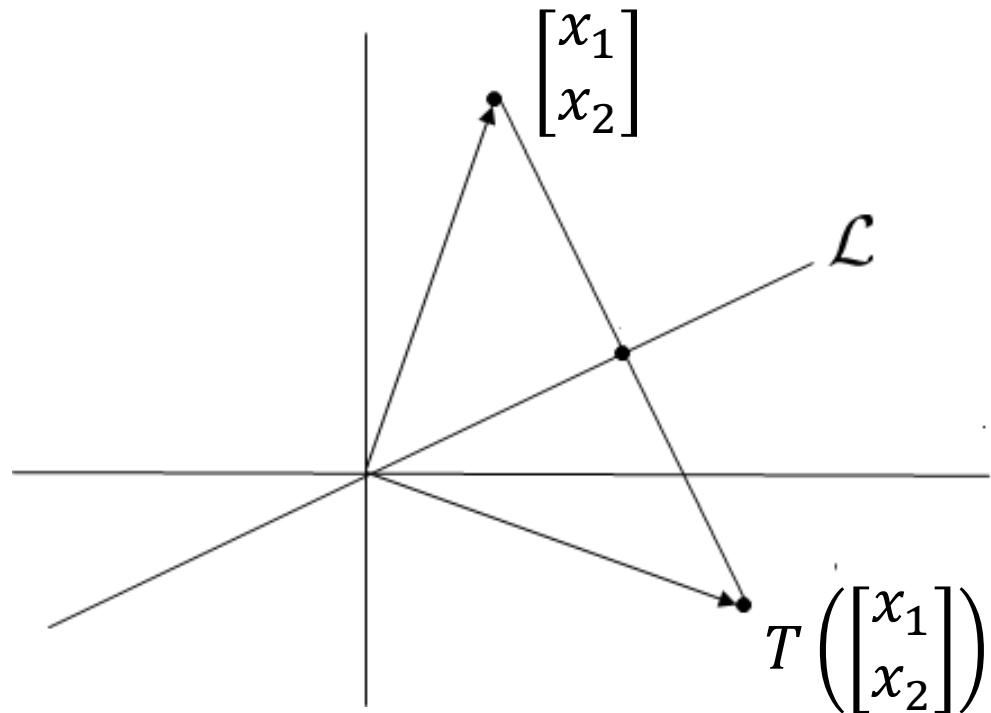

Another
coordinate
system

Cartesian
coordinate
system

Sometimes a function can be complex

- Example: reflection about a line \mathcal{L} through the origin in \mathbb{R}^2

$$T\left(\begin{bmatrix} x_1 \\ x_2 \end{bmatrix}\right) = ?$$

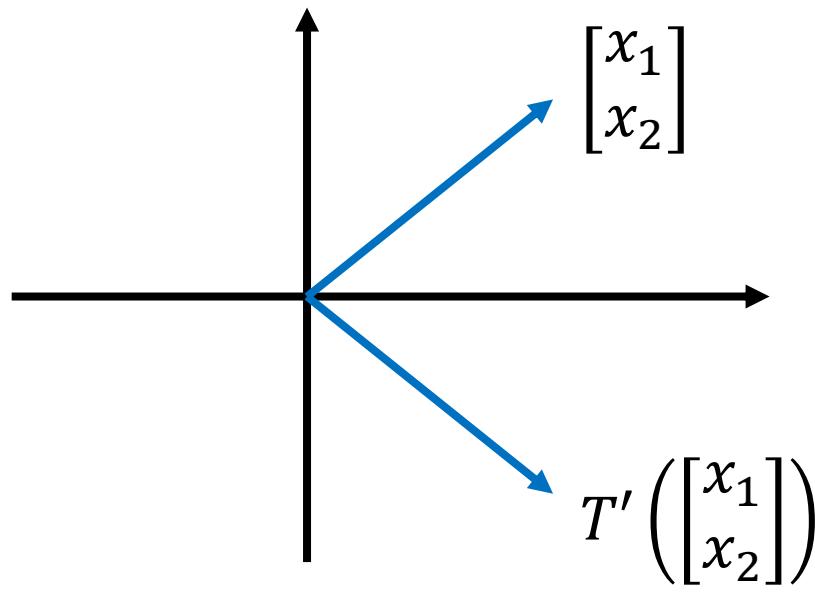

$$[T] = [T(e_1) \quad T(e_2)]$$

$$=?$$

Sometimes a function can be complex

- Example: reflection about a line \mathcal{L} through the origin in \mathbb{R}^2

special case: \mathcal{L} is the *horizontal axis*

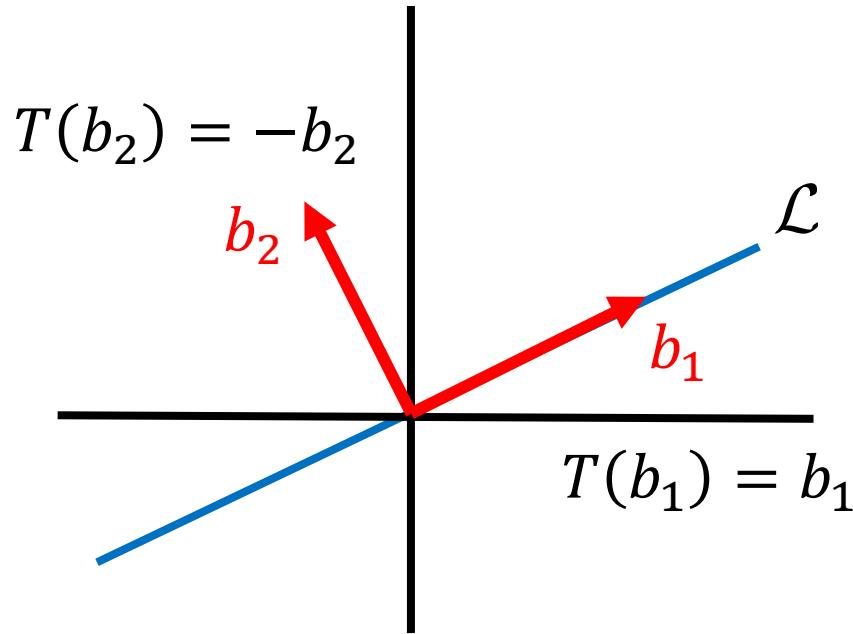

$$T' \left(\begin{bmatrix} x_1 \\ x_2 \end{bmatrix} \right) =? \begin{bmatrix} x_1 \\ -x_2 \end{bmatrix}$$

$$[T'] = \begin{bmatrix} 1 & 0 \\ 0 & -1 \end{bmatrix}$$
$$\begin{aligned} T'(e_1) &= e_1 \\ T'(e_2) &= -e_2 \end{aligned}$$

Describing the function in another coordinate system

- Example: reflection about a line \mathcal{L} through the origin in \mathbb{R}^2

In another coordinate system \mathcal{B}

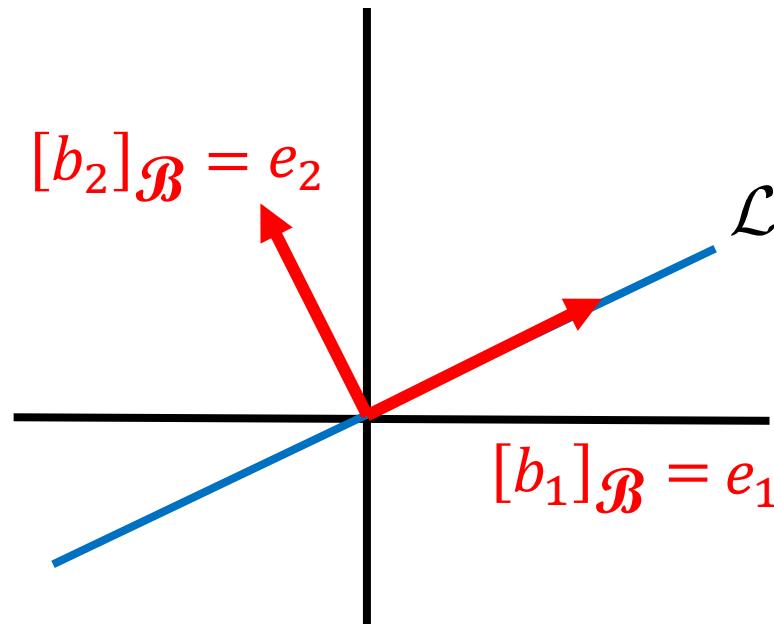

$$\mathcal{B} = \{b_1, b_2\}$$

Describing the function in another coordinate system

- Example: reflection about a line \mathcal{L} through the origin in \mathbb{R}^2

In another coordinate system \mathcal{B}

$$[T]_{\mathcal{B}} = \begin{bmatrix} 1 & 0 \\ 0 & -1 \end{bmatrix}$$

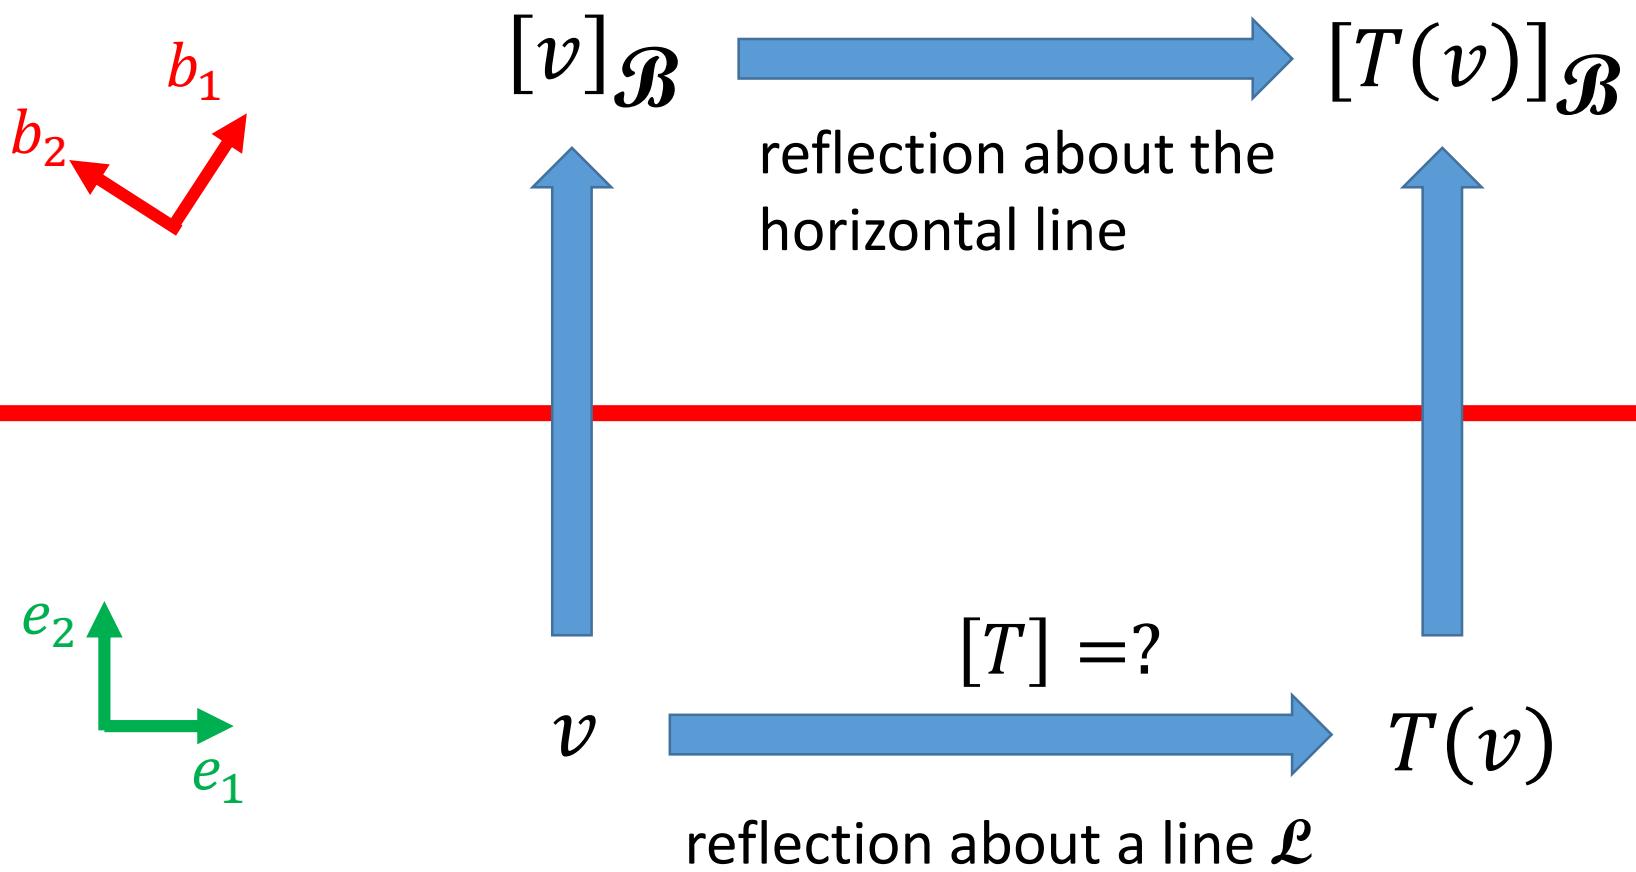

Input and output
are both in \mathcal{B}

$$\begin{aligned}[T]b_1 &= b_1 \\ \rightarrow [T]_{\mathcal{B}}([b_1]_{\mathcal{B}}) &= [b_1]_{\mathcal{B}} \\ \rightarrow [T]_{\mathcal{B}}(e_1) &= e_1 \\ [T]b_2 &= -b_2 \\ \rightarrow [T]_{\mathcal{B}}([b_2]_{\mathcal{B}}) &= [-b_2]_{\mathcal{B}} \\ \rightarrow [T]_{\mathcal{B}}(e_2) &= -e_2\end{aligned}$$

Flowchart

$$[T]_{\mathcal{B}} = \begin{bmatrix} 1 & 0 \\ 0 & -1 \end{bmatrix}$$

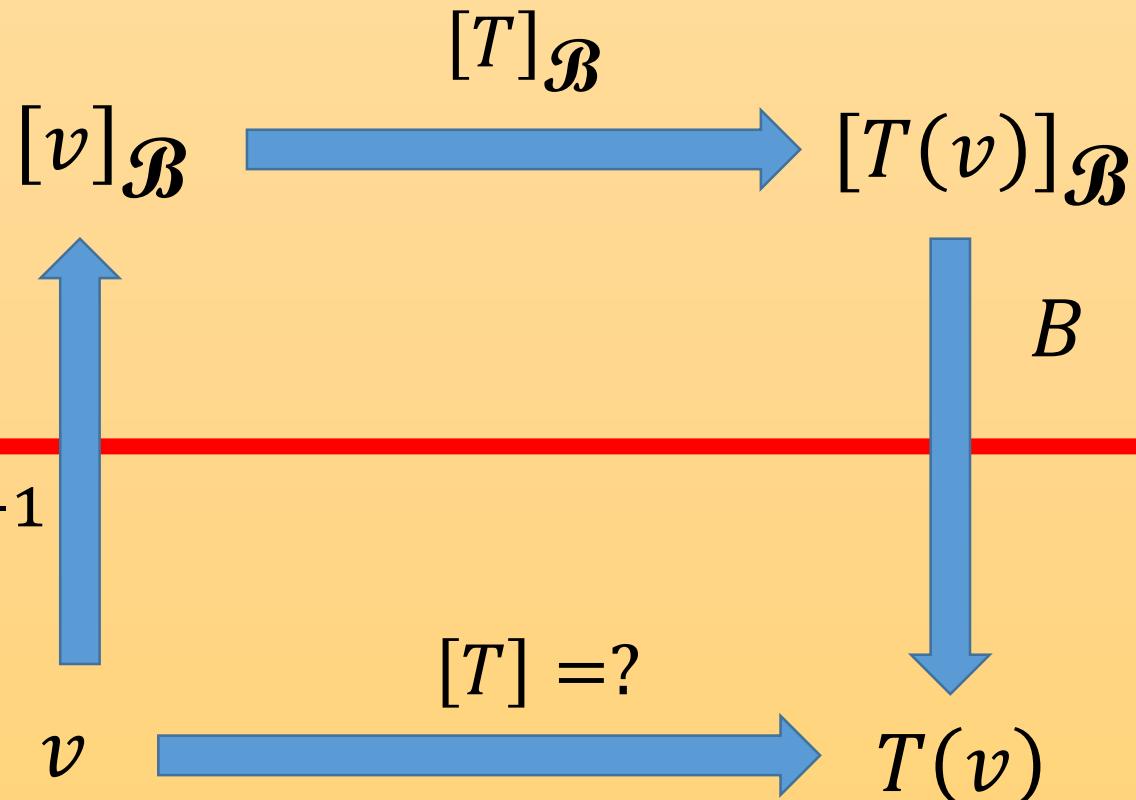

(\mathcal{B} matrix of T)

Flowchart

\mathcal{B} coordinate system

Cartesian coordinate system

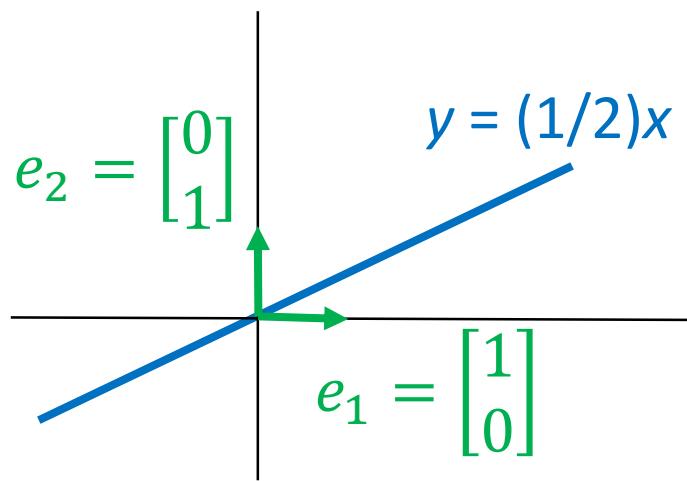

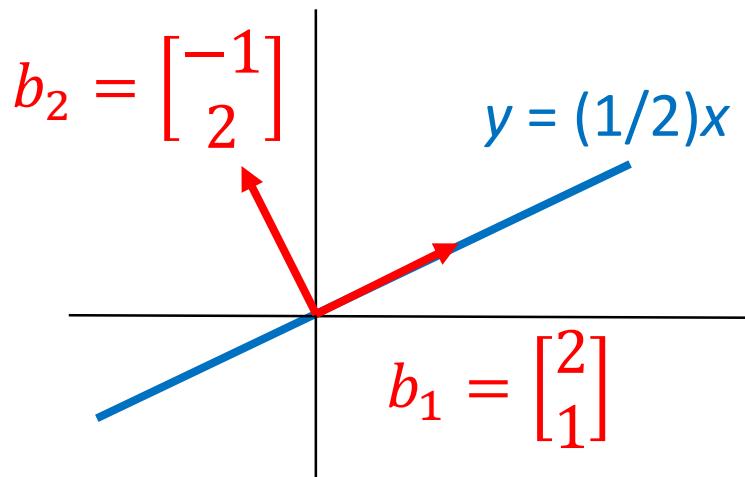

$$A = B[T]_{\mathcal{B}}B^{-1}$$

similar

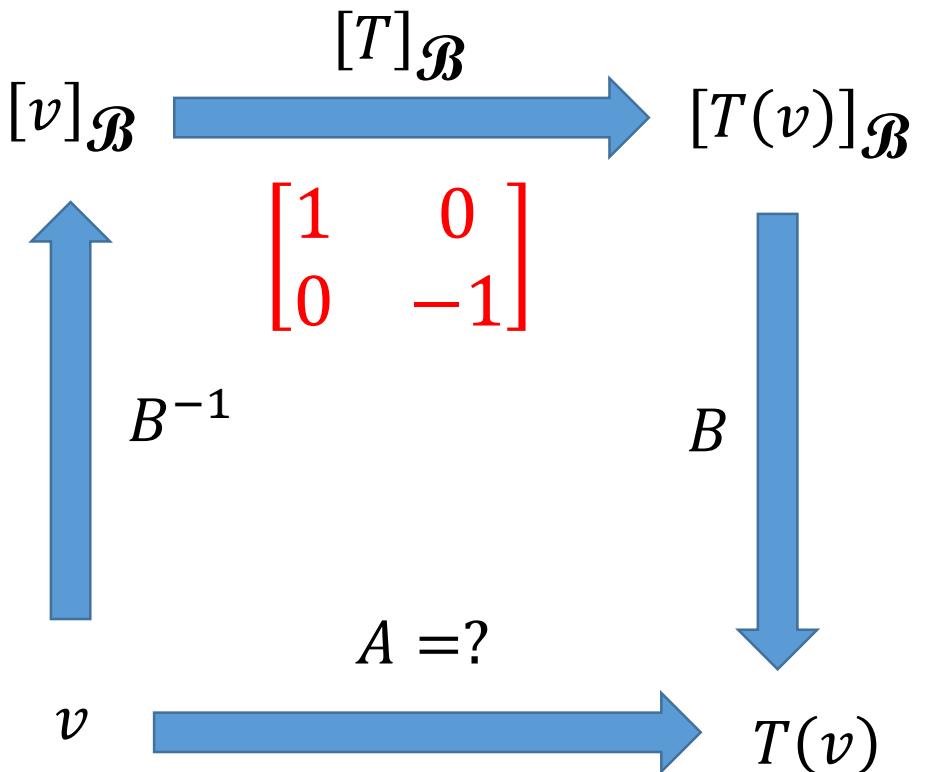

$$[T]_{\mathcal{B}} = B^{-1}AB$$

similar

- Example: reflection operator T about the line $y = (1/2)x$

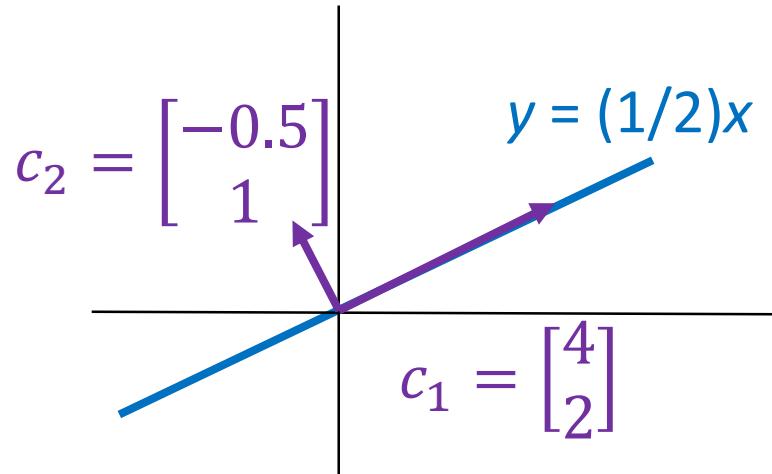

$$B^{-1} = \begin{bmatrix} 0.4 & 0.2 \\ -0.2 & 0.4 \end{bmatrix} \quad B = \begin{bmatrix} 2 & -1 \\ 1 & 2 \end{bmatrix}$$

$$A = B[T]_{\mathcal{B}}B^{-1}$$

- Example: reflection operator T about the line $y = (1/2)x$

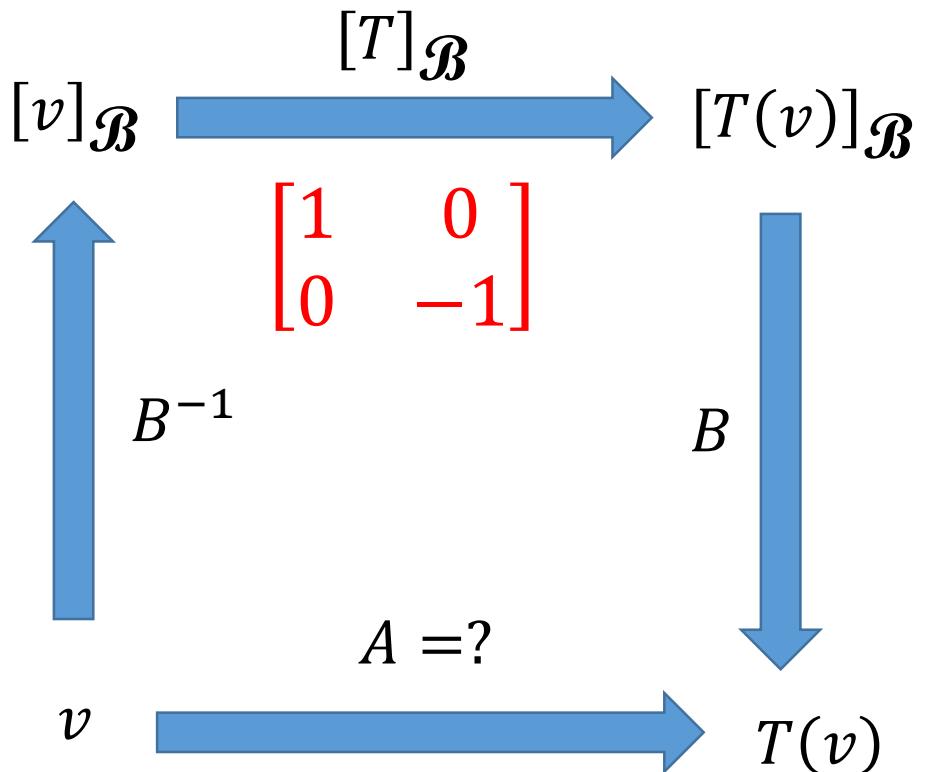

$$A = \begin{bmatrix} 0.6 & 0.8 \\ 0.8 & -0.6 \end{bmatrix}$$

$$A = \mathcal{C}[T]\mathcal{C}^{-1}$$

$$= \begin{bmatrix} 0.6 & 0.8 \\ 0.8 & -0.6 \end{bmatrix}$$

$$B^{-1} = \begin{bmatrix} 0.4 & 0.2 \\ -0.2 & 0.4 \end{bmatrix} \quad B = \begin{bmatrix} 2 & -1 \\ 1 & 2 \end{bmatrix}$$

$$A = B[T]_{\mathcal{B}}B^{-1}$$

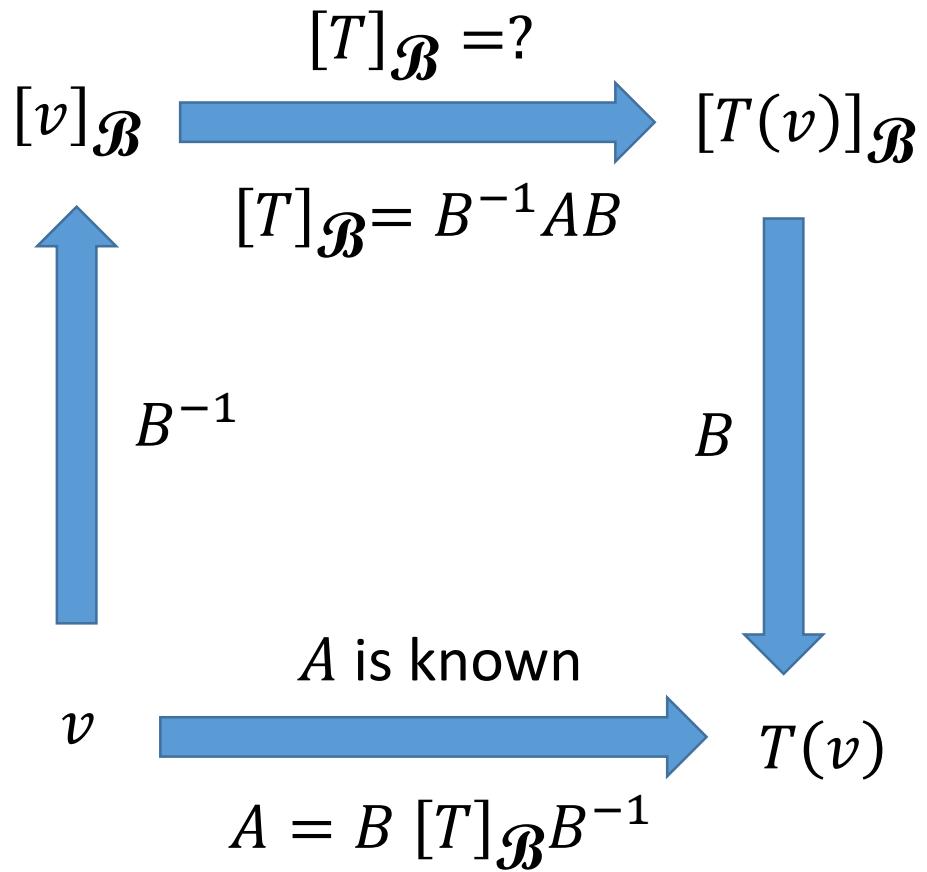

Example 2 (P279)

$$T \left(\begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} \right) = \begin{bmatrix} 3x_1 + x_3 \\ x_1 + x_2 \\ -x_1 - x_2 + 3x_3 \end{bmatrix} \quad \mathcal{B} = \left\{ \begin{bmatrix} 1 \\ 1 \\ 1 \end{bmatrix}, \begin{bmatrix} 1 \\ 2 \\ 3 \end{bmatrix}, \begin{bmatrix} 2 \\ 1 \\ 1 \end{bmatrix} \right\}$$

$$A = \begin{bmatrix} 3 & 0 & 1 \\ 1 & 1 & 0 \\ -1 & -1 & 3 \end{bmatrix}$$

$$B = \begin{bmatrix} 1 & 1 & 2 \\ 1 & 2 & 1 \\ 1 & 3 & 1 \end{bmatrix}$$

$$[T]_{\mathcal{B}} = \begin{bmatrix} 3 & -9 & 8 \\ -1 & 3 & -3 \\ 1 & 6 & 1 \end{bmatrix}$$

Example 3 (P279)

Determine T

$$T \left(\begin{bmatrix} 1 \\ 1 \\ 0 \end{bmatrix} \right) = \begin{bmatrix} 1 \\ 2 \\ 1 \end{bmatrix}$$

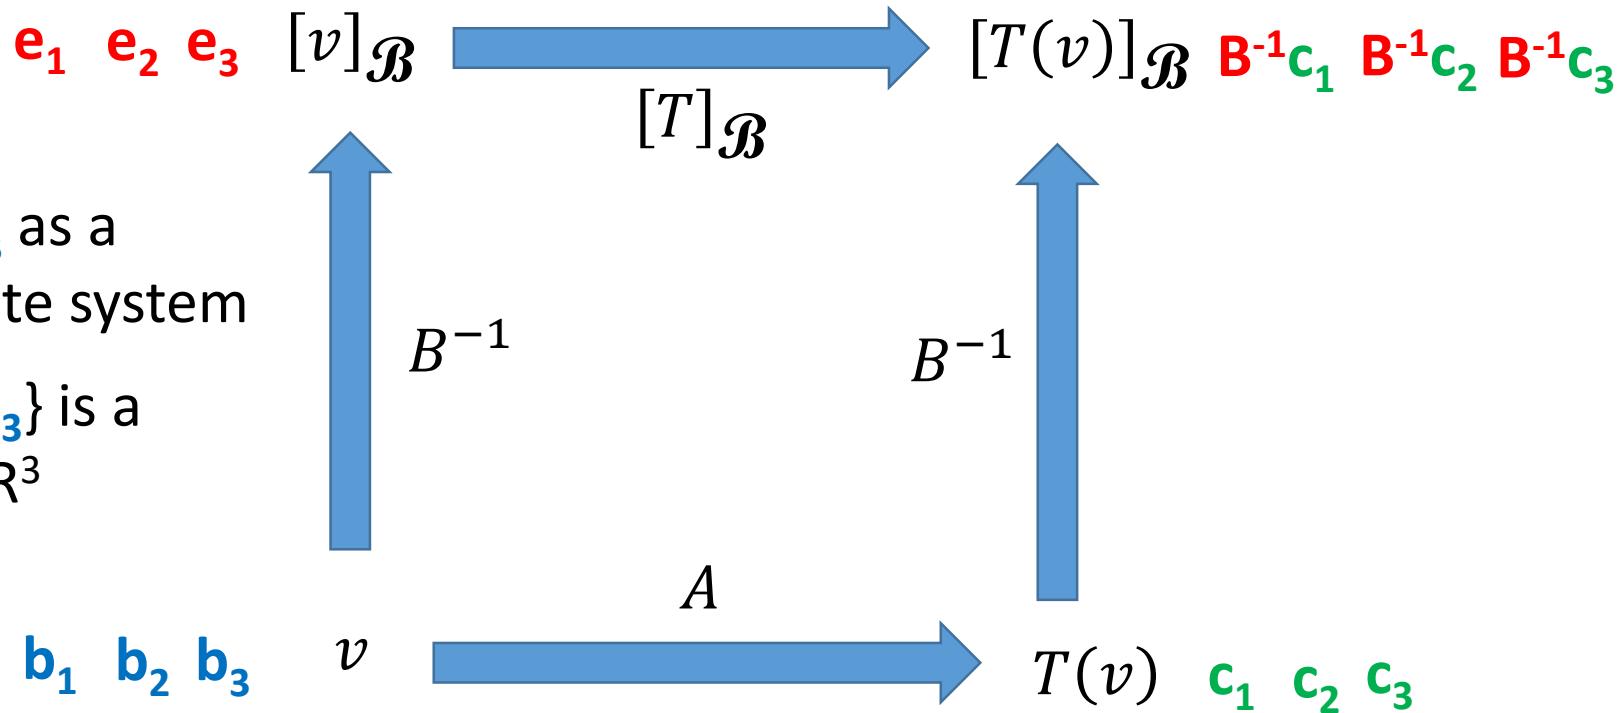

\mathbf{b}_1 \mathbf{c}_1

$$T \left(\begin{bmatrix} 1 \\ 0 \\ 1 \end{bmatrix} \right) = \begin{bmatrix} 3 \\ -1 \\ 1 \end{bmatrix}$$

\mathbf{b}_2 \mathbf{c}_2

$$T \left(\begin{bmatrix} 0 \\ 1 \\ 1 \end{bmatrix} \right) = \begin{bmatrix} 2 \\ 0 \\ 1 \end{bmatrix}$$

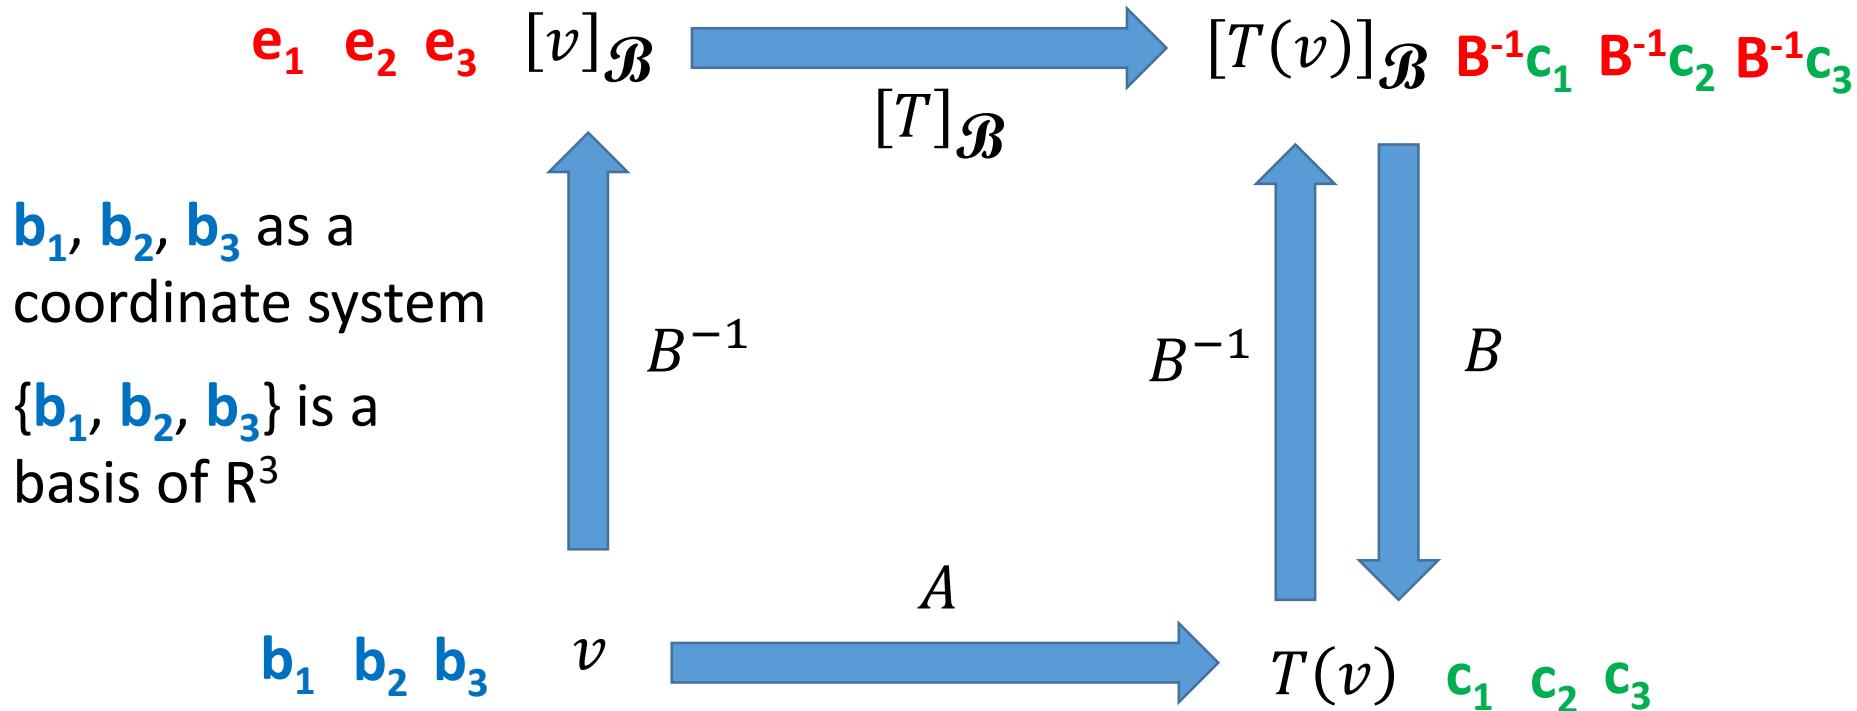

\mathbf{b}_3 \mathbf{c}_3

Example 3 (P279) Determine T

$$[T]_{\mathcal{B}} = [B^{-1}c_1 \quad B^{-1}c_2 \quad B^{-1}c_3] = B^{-1}C$$

$$A = B[T]_{\mathcal{B}} B^{-1} = BB^{-1}CB^{-1} = CB^{-1}$$

Inception

\mathcal{B} coordinate system

夢境

Cartesian coordinate system

現實

小開的父親說：

"I'm disappointed that
you're trying so hard to
be me."

$[T]_{\mathcal{B}}$

$[v]_{\mathcal{B}}$ $[T(v)]_{\mathcal{B}}$

$$[T]_{\mathcal{B}} = B^{-1}AB$$

小開有了不要繼承父業的念頭

承父業的念頭

B 清醒

做夢 B^{-1}

v

$[T]$ $[T] = B [T]_{\mathcal{B}} B^{-1}$

說服小開解散公司
